***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-4, 6-13, 17-24, 42-44 and 47-58 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6955605 in view of Commander Keen. Young claims the delivering of game module and current real-world event (claim 5) but lacks deconstructing storyline. Commander Keen discusses constructing a storyline and deconstructing storyline into game modules. Also, it is known in gaming to add current real-world event(s) such as in trivia games to add questions regarding current real world events or in sports simulation games to add/update current player performance statistics in the next game module as well as provide updates/patches for download on manufacturer/distributor website. It is maintained by Office that claimed game module include expansion packs, fixes, patches as well as subsequent game(s) in a series (as evidence only under MPEP 2144.03 and/or 2131.01 regarding providing game module as expansion pack, fixes,

Art Unit: 3714

patches, and/or subsequent game see the Commander Keen series 1-6, sequential sport simulations that use player performance statistics such as John Madden Football series, Tony LaRosa baseball series, Ultima Online game updates, patches, fixes, expansions) Thus, it would have been obvious to an artisan at a time prior to the invention to apply the process of deconstructing a storyline into a plurality of episodes as taught by Commander Keen references to improve the method of Young for the predictable result of setting a storyline to chapter/series distribution.
